

Association of cannabis use disorder with cardiovascular diseases : A two-sample

Mendelian randomization study

Miao Chen, Yun-long Lu, Zhen Wang, Liang Ma

Supplementary Material

Table 1. Descriptive information of the datasets included in the analyses.

GWAS	Phenotype	Participants	Ancestry	Used in MR	ID in IGD*	Web link for data source
Johnson EC, 2020	Cannabis use disorder	14,080 cases 343,726 controls	European	Exposure	—	https://www.med.unc.edu/pgc/download-results/
GSCAN	Smoking	337,334 individuals	European	Confounder	—	https://www.ebi.ac.uk/gwas/publications/30643251
GSCAN	Alcohol	941,280 individuals	European	Confounder	—	https://www.ebi.ac.uk/gwas/publications/30643251
GIANT	Body mass index	322,154 individuals	European	Confounder	ieu-a-835	https://gwas.mrcieu.ac.uk/
GLGC	Blood lipid	188,577 individuals	European	Confounder	ieu-a-299, ieu-a-300 ieu-a-301, ieu-a-302	https://gwas.mrcieu.ac.uk/
DIAGRAM	Type 2 diabetes	110,452 individuals	Multi-ancestry	Confounder	ieu-a-23	https://gwas.mrcieu.ac.uk/
UK biobank (MRC-IEU, 2018)	Hypertension	463,010 individuals	European	Confounder	ukb-b-12493	https://gwas.mrcieu.ac.uk/
Howard et al, 2019	Depression	246,363 cases 561,190 controls	Multi-ancestry	Confounder	—	https://datashare.ed.ac.uk/handle/10283/3203
CARDIoGRAMplusC4D	Coronary artery disease	60,801 cases 123,504 controls	Multi-ancestry	Outcome	ieu-a-7	https://gwas.mrcieu.ac.uk/
CARDIoGRAMplusC4D	Myocardial infarction	43,676 cases 128,199 controls	Multi-ancestry	Outcome	ieu-a-798	https://gwas.mrcieu.ac.uk/
Roselli C, 2018	Atrial fibrillation	55,114 cases 482,295 controls	European	Outcome	ebi-a-GCST006061	https://gwas.mrcieu.ac.uk/
Shah S, 2020	Heart failure	47,309 cases 930,014 controls	European	Outcome	—	https://cvd.hugeamp.org/downloads.html

UK biobank (MRC-IEU, 2018)	Deep vein thrombosis	9,241 cases 453,692 controls	European	Outcome	ukb-b-12040	https://gwas.mrcieu.ac.uk/
UK biobank (MRC-IEU, 2018)	Pulmonary embolism	3,823 cases 459,110 controls	European	Outcome	ukb-b-16048	https://gwas.mrcieu.ac.uk/
Malik R, 2018	Stroke	40,585 cases 406,111 controls	European	Outcome	ebi-a-GCST005838	https://gwas.mrcieu.ac.uk/

Table 2. Detailed information for the genome-wide association study of exposure and outcomes.

GWAS	Cases source	Cases definition
Cannabis use disorder	Psychiatric Genomics Consortium Substance Use Disorders working group, Lundbeck Foundation Initiative for Integrative Psychiatric Research, and deCODE	DSM-IV (or DSM-III-R) cannabis abuse or dependence, DSM-5 cannabis use disorder, ICD-10 codes of F12.1 (cannabis abuse) or F12.2 (cannabis dependence).
Coronary artery disease, Myocardial infarction	Coronary Artery Disease Genome-Wide Replication and Meta-analysis and Coronary Artery Disease Genetics (CardiogramplusC4D) consortium	An inclusive CAD diagnosis of MI, acute coronary syndrome, chronic stable angina or coronary stenosis of >50%
Atrial fibrillation	AFGen consortium, Broad AF study, UK Biobank, and Biobank Japan	Participants with paroxysmal or permanent AF, or atrial Flutter. Codes in UK biobank: non-cancer illness code, self-reported (1471, 1483); operation code (1524); diagnoses-main/secondary ICD10 (I48, I48.0-4, I48.9); underlying (primary/secondary) cause of death: ICD10 (I48, I48.0-4, I48.9); diagnoses-main/secondary ICD9 (4273); operative procedures-main/secondary OPCS (K57.1, K62.1-4)
Heart failure	26 cohorts with either a case-control or population-based study design	A clinical diagnosis of HF of any aetiology with no inclusion criteria based on LV ejection fraction
Deep vein thrombosis	UK Biobank	Code in UK biobank: non-cancer illness code, self-reported (deep venous thrombosis)
Pulmonary embolism	UK Biobank	Code in UK biobank: non-cancer illness code, self-reported (pulmonary embolism +/- dvt)
Stroke	29 studies	Defined according to the World Health Organization (WHO), signs of rapid development of focal (or global) disturbance of cerebral function, and lasting more than 24 hours or leading to death with no apparent cause other than that of vascular origin

Table 3. Descriptive information of the replication datasets of cardiovascular diseases used in the analyses

GWAS	Phenotype	Participants	Ancestry	ID in IGD*	Web link for data source
UK biobank (Neale lab, 2018)	Coronary artery disease	10,157 cases 351,037 controls	European	ukb-d-I9_CHD	https://gwas.mrcieu.ac.uk/
UK biobank (MRC-IEU, 2018)	Myocardial infarction	10,616 cases 452,317 controls	European	ukb-b-15829	https://gwas.mrcieu.ac.uk/
Nielsen JB, 2018	Atrial fibrillation	60,620 cases 970,216 controls	European	ebi-a-GCST006414	https://gwas.mrcieu.ac.uk/
UK biobank (Neale lab, 2018)	Heart failure	1,405 cases 359,789 controls	European	ukb-d-HEARTFAIL	https://gwas.mrcieu.ac.uk/
UK biobank (Neale Lab, 2017)	Deep vein thrombosis	6,767 cases 330,392 controls	European	ukb-a-65	https://gwas.mrcieu.ac.uk/
UK biobank (Neale Lab, 2017)	Pulmonary embolism	2,801 cases 334,358 controls	European	ukb-a-64	https://gwas.mrcieu.ac.uk/
Malik, 2016	Stroke	10,307 cases 19,326 controls	Mixed	ieu-a-1108	https://gwas.mrcieu.ac.uk/

*IGD: The IEU GWAS database (<https://gwas.mrcieu.ac.uk/>)

Table 4. Associations of single nucleotide polymorphisms for cannabis use disorder.

SNP	Chr	Position	EA	NEA	EAF*	Beta	SE	P-value	N	R ²	F-statistic

SNP, single nucleotide polymorphism; Chr, chromosome; EA, effect allele; NEA, non-effect allele; EAF, effect allele frequency.

*EAF were obtained from the ALFA project (<https://www.ncbi.nlm.nih.gov/snp>)

Table 5. Sample size and power calculations in Mendelian randomization study of cannabis use disorder and risk of cardiovascular.

Outcome	Sample size	Proportion of cases	Selected scenarios*					
			OR=1.10	OR=1.20	OR=1.30	OR=1.40	OR=1.50	OR=1.60
Coronary artery disease	184305	0.33	0.09	0.23	0.42	0.63	0.80	0.91
Myocardial infarction	171875	0.25	0.09	0.19	0.36	0.55	0.73	0.86
Atrial fibrillation	537409	0.10	0.11	0.28	0.53	0.77	0.92	0.98
Heart failure	977323	0.05	0.10	0.27	0.52	0.76	0.92	0.98
Deep vein thrombosis	462933	0.02	0.06	0.09	0.15	0.22	0.32	0.43
Pulmonary embolism	462933	0.01	0.06	0.07	0.10	0.14	0.19	0.25
Stroke	446696	0.09	0.09	0.22	0.43	0.65	0.83	0.94

*Type 1 error of 5% and a proportion of variance explained equal to 4% are assumed.

OR: True odds ratio of the outcome variable per standard deviation of the exposure variable.

Table 6. Estimates for the association between cannabis use disorder and cardiovascular diseases.

Outcome	Method	OR	95% CI	P-value	Q-value
Coronary artery disease	IVW (multiplicative random effects)	1.057	(1.008, 1.107)	0.021	0.021
	Simple median	1.062	(0.983, 1.147)	0.128	0.179
	Weighted median	1.052	(0.970, 1.140)	0.219	0.256
	MR PRESSO			0.790	
Myocardial infarction	IVW (multiplicative random effects)	1.056	(1.014, 1.099)	0.008	0.014
	Simple median	1.039	(0.960, 1.124)	0.341	0.341
	Weighted median	1.019	(0.937, 1.109)	0.659	0.659
